

2004 Statewide Preservation Program (SPP)

2004

UNIFIED TRANSPORTATION PROGRAM-
Statewide Preservation Program

Blank Page

Executive Summary

The inaugural Unified Transportation Program, Statewide Preservation Program (SPP) follows. This document encompasses funding strategies to maintain the existing transportation system and is part of the **Maintain It** budget strategy.

The SPP contains funding information on two highway construction programs:

- Category 1- Preventive Maintenance and Rehabilitation
- Category 6- Structures Replacement and Rehabilitation

It also contains information on two highway maintenance-funding strategies:

- Routine Maintenance
- Contracted Routine Maintenance

The proposed and existing programming amounts are contained on the following funding distribution summary. These programs represent preservation efforts to maintain the existing transportation system and protect existing taxpayer investments.

INTRODUCTION

Planning for the Future

In August 2001, Texas Transportation Commission Chairman, John W. Johnson, published a report to Governor Rick Perry, the members of the Texas Legislature and all Texans, entitled "**Texas Transportation Partnerships**." That report established five goals to assist the department in building a new vision for Texas transportation and its infrastructure.

These goals were to provide:

- **Reliable mobility**
- **Improved safety**
- **Responsible systems preservation**
- **Streamlined project delivery**
- **Economic vitality**

Upon these goals, the [2003 – 2007 Strategic Plan](#) was developed. In an effort to streamline agency processes and make them easily understood by the public, simplified budget strategies, including outputs and efficiency measures, were proposed to the Legislative Budget Board.

These strategies include:

- **Plan It** 
- **Build It** 
- **Maintain It** 
- **Use It** 
- **Manage It** 

The highway programs should provide the structure to achieve many of the goals and output measures brought forward in the Texas Transportation Partnerships and the Strategic Plan.

What is the Unified Transportation Program (UTP)?

The Texas Transportation Commission ([commission](#)) and the Texas Department of Transportation (TxDOT) use the Unified Transportation Program (UTP) as TxDOT's ten-year plan to guide transportation project development and construction.

Why is the Unified Transportation Program (UTP) published?

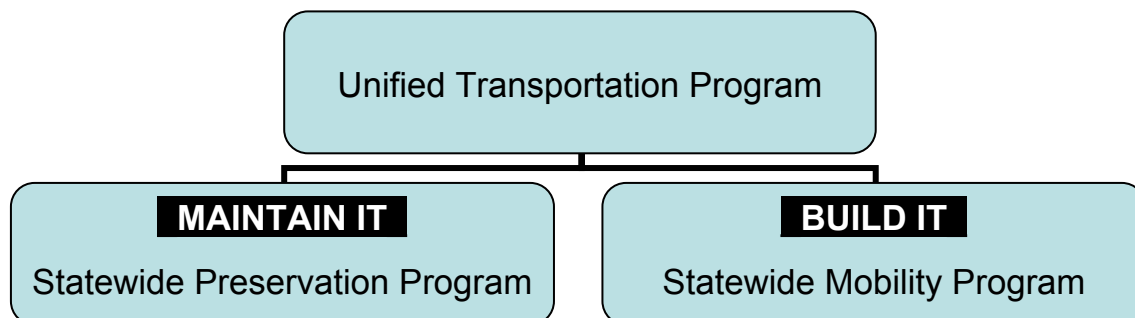

Federal transportation legislation, such as the Transportation Equity Act for the 21st Century ([TEA-21](#)), and its predecessor, the Intermodal Surface Transportation Efficiency Act ([ISTEA](#)) of 1991, specified the transportation systems on which certain federal funds can be used and defines the role of the Metropolitan Planning Organizations ([MPO](#)) in the planning and development of projects. This Federal transportation legislation required each designated Metropolitan Planning Organization to develop a Transportation Improvement Program (TIP) and the state to compile a Statewide Transportation Improvement Program (STIP) as a condition of securing federal funds for transportation projects. The projects listed in the STIP, when approved by the Federal Highway Administration ([FHWA](#)) and the [Federal Transit Administration](#), are the only transportation projects that can utilize federal funds. Though TEA-21 expires in October 2003, the department anticipates any new transportation legislation to include the requirement of a STIP.

Therefore, the UTP, a ten-year financial plan, and the STIP, a three-year financial plan, are used as the backbone for project development on Texas' intermodal transportation network. The UTP is the commission's mechanism to authorize project development.

Continued Improvement

In order to align the UTP with the simplified budget strategies outlined in the [2003 – 2007 Strategic Plan](#), the department has divided the UTP into two documents:

- The Statewide Mobility Program (SMP)
- The Statewide Preservation Program (SPP)

MAINTAIN IT

Statewide Preservation Program (SPP)

This document encompasses funding strategies to maintain the existing transportation system and is part of the **Maintain It** budget strategy.

It contains information on two highway construction programs:

- Category 1- Preventive Maintenance and Rehabilitation
- Category 6- Structures Replacement and Rehabilitation

It also contains information on two highway maintenance-funding strategies:

- Routine Maintenance
- Contracted Routine Maintenance

These programs represent preservation efforts to maintain the existing transportation system and protect existing taxpayer investments.

Plan It Maintain It Manage It

BUILD IT

Statewide Mobility Program (SMP)

This document will contain information regarding the **Build It** budget strategy and contains the following highway construction categories:

- Category 2 – Metropolitan Area (TMA) Corridor Projects
- Category 3 – Urban Area (Non-TMA) Corridor Projects
- Category 4 – Statewide Connectivity Corridor Projects
- Category 5 – Congestion Mitigation and Air Quality Improvement
- Category 7 – Surface Transportation Program (STP) Metropolitan Mobility and Rehabilitation
- Category 8 – STP Safety
- Category 9 – STP Transportation Enhancements
- Category 10 – Miscellaneous
- Category 11 – District Discretionary
- Category 12 – Strategic Priority

What are the contents of the SPP and SMP?

The SPP and SMP contain:

- this introduction;
- a listing of requirements for the use of the transportation funds along with the commission's policies;
- a summary of highway construction allocation program amounts;
- listings of project-specific highway construction projects the commission has approved for construction or development;

What is the difference in project-specific and allocation programs?

Allocation Programs- The allocation program is a fund management tool. The commission has delegated the responsibility for selecting projects and funds management to the lowest possible levels (the TxDOT districts and divisions). TxDOT manages most highway construction programs through allocations. Projects can be selected for development, developed and let to contract with each project's cost debited to the allocated funds available for that program. Most allocation programs consist of projects requiring relatively short development times and are intended to preserve the existing highway system. The allocation program process of developing projects allows TxDOT (both the districts and divisions) the flexibility to respond to modifications requested by the MPO and others without going back to the commission for every project change or cancellation, as long as the total allocation for that program is not exceeded.

Project-Specific Programs- the projects in these programs are listed in the UTP. The highway construction programs managed by TxDOT as project specific are major projects to improve mobility or safety. These major projects are usually associated with longer development periods; higher constructions cost and compete statewide for funds.

What does the Level of Authority mean?

Programming and Funding- An important factor in the project development and selection process is the amount of funds available to construct projects. In order for TxDOT's project development process to maintain its efficiency, projects must be selected years in advance of their actual funding and construction. A project must pass through many development steps including: researching proposed routes; studying environmental impacts; performing engineering surveys; holding public hearings; signing agreements with the counties or cities (if needed to fulfill state or federal requirements); acquiring right-of-way; producing construction plans; and awarding construction contracts.

The actions listed above, and countless others, must occur in sequence to bring a project from an idea, to a reality. Therefore, a project must be programmed years in advance of the actual construction, to ensure that all development steps are completed at the appropriate time.

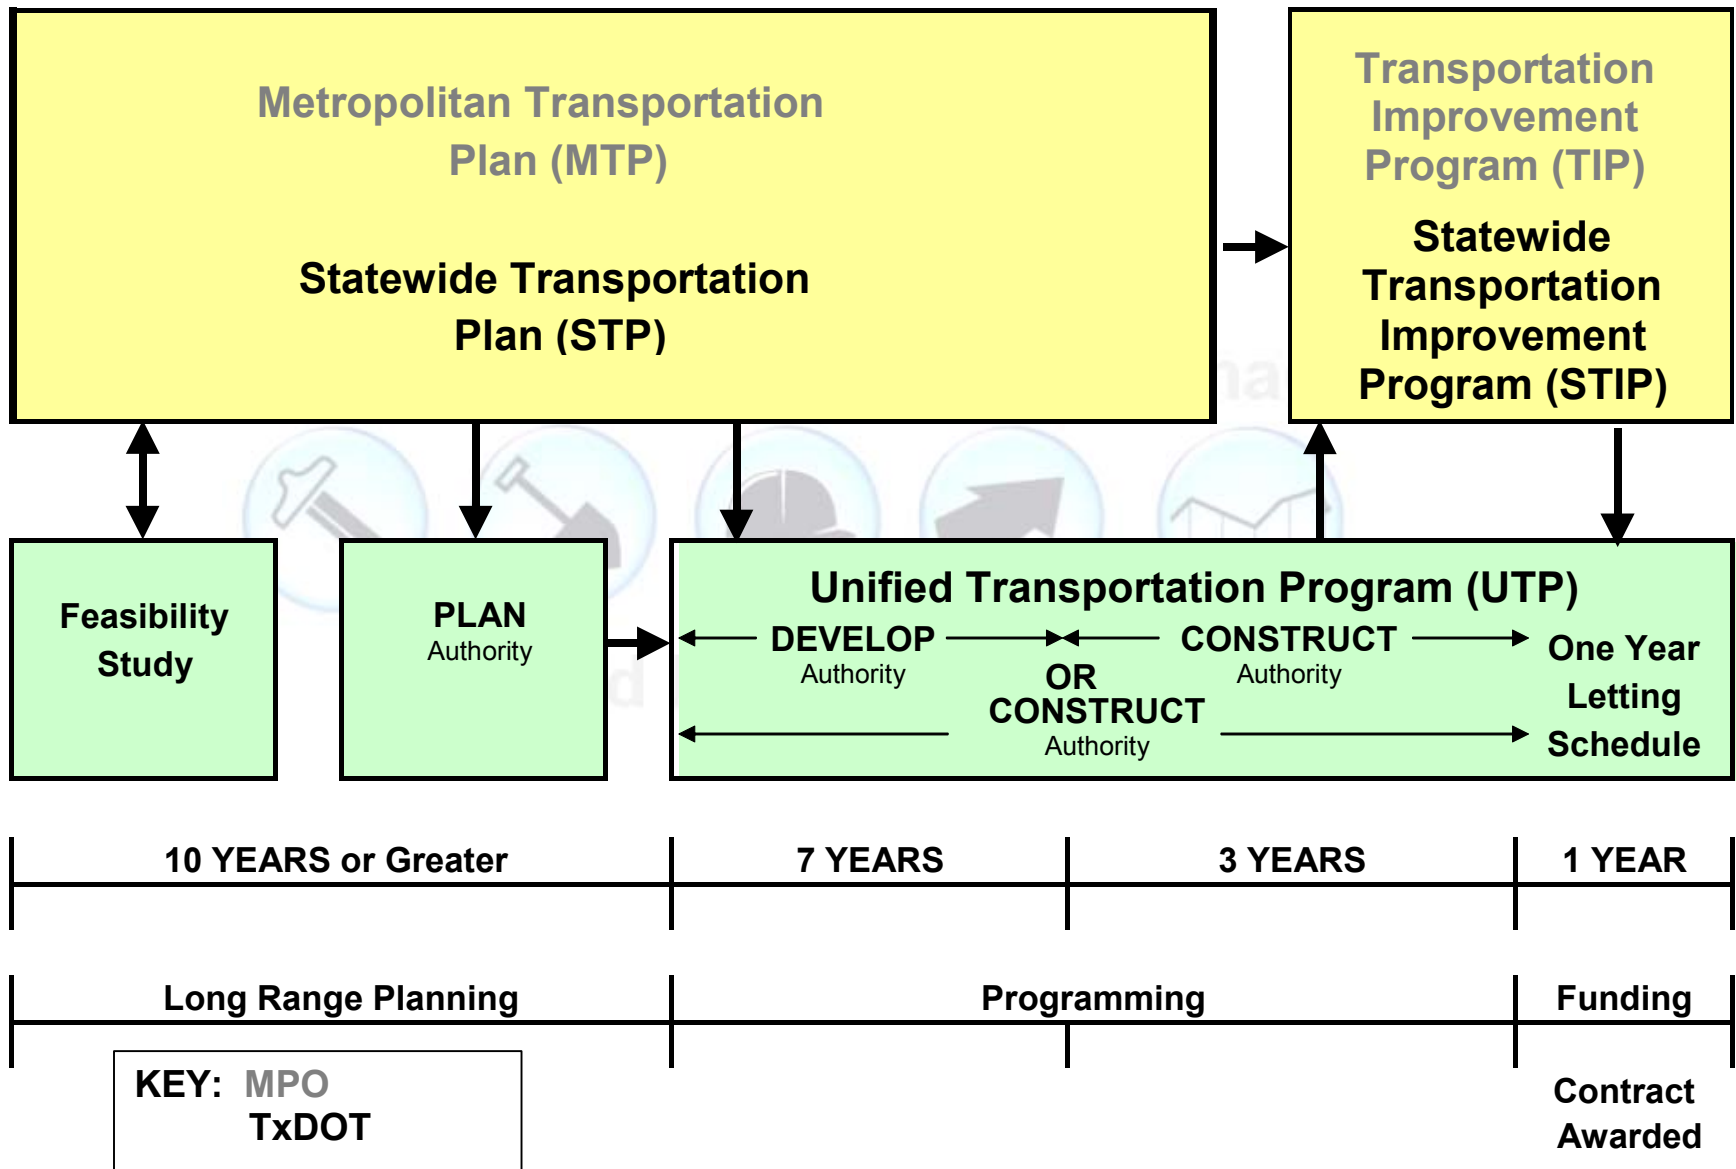

The steps required in project development have been organized into three levels of development authority listed below. The commission uses these levels of authority to authorize district resource expenditures to complete the development actions included in each level. A chart depicting the levels of authority, including approximate times allowed for each level, is located on page VII of this section.

PLAN (formerly Long Range Project)- Projects with this level of authority are in the initial stages of development. This development authority is reserved for mobility or other high capital cost projects where the route studies, environmental impact studies, and right of way determination can take a substantial amount of time. PLAN status authorizes the TxDOT districts to complete the necessary right of way determination including drafting the right of way map, studying routes, performing environmental impact studies, and holding public hearings. Projects with PLAN status are not listed in the UTP because their construction is planned beyond the ten years contained in the UTP.

DEVELOP (formerly Priority 2)- This level of authority authorizes the TxDOT districts to prepare the construction plans and acquire the necessary right of way. Districts should substantially complete project construction plans (geometric, structural, hydraulic and pavement design) and required right-of-way acquisition prior to moving to CONSTRUCT authority. The amount of projects in DEVELOP is constrained to **seven** years of anticipated future funding.

CONSTRUCT (formerly Priority 1)- This status authorizes the TxDOT district to complete the construction plans, perform the utility adjustments, and award a construction contract for the project in the scheduled Fiscal Year.

THE PROJECT DEVELOPMENT & PLANNING PROCESS

STATEWIDE PRESERVATION PROGRAM (SPP) SUMMARY OF CATEGORIES

MAINTAIN IT

CATEGORIES NUMBER AND NAME - DOCUMENT	PROGRAMMING AUTHORITY	USUAL FUNDING	ALLOCATION PROG (Yes/No) RESPONSIBLE ENTITY	RANKING INDEX OR ALLOCATION FORMULA	BRIEF SUMMARY, RESTRICTIONS, ETC
HIGHWAY CONSTRUCTION PROGRAMS					
1 Preventive Maintenance and Rehabilitation SPP	Commission allocation by formula. Allocation program to districts Projects selected by Districts.	Federal 90% State 10% Or Federal 80% State 20% Or 100% State	Yes, Districts	This category was created by consolidating old Categories 2, 3C, 4F, 7, 8A, 10A, 10B, & 14 from the 2002 UTP. The old formulas will continue to be used and the funding amounts consolidated until a new formula can be developed. The old formulas can be found in Exhibit A of the 2002 UTP at: http://www.dot.state.tx.us/moneymatters/moneymatters.htm?pg=utp	Preventive maintenance and rehabilitation of the existing State Highway System. The rehabilitation funds may be used for rehabilitation of the Interstate Highway System main lanes, frontage roads, structures, rehabilitation of signs, pavement markings, striping, etc. The Transportation Planning and Programming Division may approve the use of rehabilitation funds for the construction of interchanges and HOV lanes on the Interstate Highway System. Rehabilitation funds may not be used for the construction of new SOV lanes.
6 Structures Replacement and Rehabilitation SPP	Commission approval. Project-specific Selected statewide based on Texas Eligible Bridge Selection System (TEBSS) and Evaluated statewide by cost- benefit	Federal 80% State 20% Federal 80% State 10% Local 10% Or 100% State	No Commission	Texas Eligible Bridge Selection System (TEBSS) and Vehicle & train traffic, accident rates, vertical clearance, roadway characteristics	Replacement or rehabilitation of eligible bridges on and off the state highway system (functionally obsolete or structurally deficient). Replacement of existing highway-railroad grade crossings, and the rehabilitation or replacement of deficient railroad underpasses on the state highway system. Specific locations evaluated by cost-benefits derived index (benefits such as improved traffic flow, accident/fatality reduction. These funds may be used for preventive maintenance activities on bridges- requires commission approval.

**HIGHWAY CONSTRUCTION PROGRAMS
POLICY AND RESTRICTIONS**

Blank Page

Category 1
Preventive Maintenance and Rehabilitation

Description

This category provides for the preventive maintenance and pavement rehabilitation on the existing State Highway System including installation and rehabilitation of traffic control devices, and the rehabilitation and maintenance of operational traffic management systems. Category 1 is intended for use in rehabilitating pavements on the state highway system.

Restrictions

Preventive Maintenance- This work is intended to preserve, rather than improve, the structural integrity of the pavement and/or structure. Examples of preventive maintenance activities include asphalt concrete pavement (ACP) overlays (2" thick maximum); seal coats; cleaning and sealing joints and cracks; patching concrete pavement; shoulder repair; scour countermeasures; cleaning and painting steel members to include application of other coatings; restore drainage systems; cleaning and sealing bridge joints; micro-surfacing; bridge deck protection; milling or bituminous level-up; clean, lubricate and reset bearings; and clean rebar/strand and patch structural concrete and seal cracks.

Rehabilitation- This category funds can be expended on any highway on the state highway system, and are intended for the rehabilitation (including approved preventive maintenance measures) of existing main lanes, structures and frontage roads.

Funds expended on the Interstate Highway system can also be used to build interchanges, high occupancy vehicle (HOV) lanes or auxiliary lanes on Interstate highways with prior approval by the Transportation Planning and Programming Division Director; however, funds cannot be used to add lanes for single occupancy vehicles (SOVs).

This category also addresses the replacement and refurbishing of signs and their appurtenances, raised reflective pavement markers and thermoplastic striping on Interstate highways.

This category is also used to address the installation and/or rehabilitation signs, pavement markings, traffic signals, and illumination systems, including minor roadway modifications to improve operations. Funds can be used to install new traffic signals as well as modernize existing signals. The normal installation of signing and markers through construction projects and maintenance operations is not considered eligible for this category.

This category may also be used to address the rehabilitation and maintenance of operational traffic management systems. Funds used in this manner can only be spent on contractor payments (including parts and labor) which are contracted through either the construction or General Services (ie.- catalog procurement) process. The purchase of spare parts, test equipment and other materials that will be installed by TxDOT forces are not eligible.

All projects must be developed in accordance with applicable federal and state environmental requirements. All projects must be designed, constructed, operated, and maintained in accordance with state laws, regulations, directives, safety standards, design and construction standards as required by TEA-21.

Projects in this category must have the concurrence of the MPO if it is located in their area of jurisdiction.

<u>Allocation to Districts</u>	<p>Allocations for the <u>Preventive Maintenance and Rehabilitation Program</u> are approved by the commission, with the districts receiving allocations based on the following formula:</p> <p>The allocations for the 2004 Unified Transportation Program were obtained by consolidating funds after use of the formulas from the following previous categories: 7, 2, 3C, 4F, 8A, 10A, 10B, & 14. For these previous formulas see Exhibit A of the 2002 Unified Transportation Program at: ftp://ftp.dot.state.tx.us/pub/txdot-info/tpp/2002utp.pdf.</p> <p>A new formula should be developed for use in the 2005 UTP.</p> <p>This program is managed as an allocation program with eligible projects developed by the districts on an as-needed basis within their allocations. Interstate Rehabilitation Programs are usually one-year programs with the program funds available for use within four years.</p>
<u>Policy</u>	<p>Match for preliminary engineering, construction, and right-of-way purchase/utilities will be in accordance with TxDOT's policy for Matching Funds - Participation Ratios.</p>
<u>Levels of Authority</u>	<p>CONSTRUCT – Projects authorized for complete PS&E preparation, right-of-way acquisition, utility adjustments and construction letting. (Current year plus the next three years)</p>

Category 6

Structures Replacement and Rehabilitation

<u>Description</u>	<p>Category 6 is to address the replacement or rehabilitation of deficient existing bridges located on the public highways, roads and streets in the state and the construction of grade separations at existing highway-railroad grade crossings, and the rehabilitation of deficient railroad underpasses on the state highway system.</p>
<u>Restrictions</u>	<p>Bridge projects must meet eligibility criteria including:</p> <ol style="list-style-type: none">1. being classified as functionally or structurally deficient under FHWA criteria;2. and having a FHWA sufficiency rating less than 50 to be eligible for replacement, or having and FHWA sufficiency rating less than 80 to be eligible for rehabilitation. <p>All bridge replacements and rehabilitation must be in accordance with TxDOT's design standards.</p> <p>The railroad grade separation projects must be at an existing highway-railroad grade crossing and replace or rehabilitate an existing deficient railroad underpass on the state highway system. The on state highway roadway must have a functional classification greater than a local road or rural minor collector.</p> <p>All projects in this category must have the concurrence of the MPO if located within their area of jurisdiction. These projects must be developed in accordance with the applicable state or federal environmental requirements. They must be designed, constructed, operated, and maintained in accordance with state laws, regulations, directives, safety standards, design and construction standards as required by TEA-21.</p>
<u>Project Selection</u>	<p>The Bridge Division ranks, prioritizes and makes project selection recommendations to the commission. The commission approves all projects for this category. On and off-state system bridge projects are selected using a statewide prioritization process that utilizes a calculated score for each candidate bridge. These score considers average daily traffic, cost per vehicle, bridge condition, adequacy of roadway width and overall bridge sufficiency. The actual scoring process is referred to as the Texas Eligible Bridge Selection System (TEBSS). However, projects involving eligible candidate bridges that are appraised by TxDOT as having a "critical condition" may be selected regardless of the TEBSS score. Railroad grade separation projects are selected using a statewide prioritization process that utilizes a cost-benefit index (CBI). This CBI considers average daily traffic, number of fatalities and injuries, and delay to vehicle traffic.</p> <p>For off-state highway system bridge projects selected under the statewide prioritization process, consideration may be given under certain circumstances to a local government's preference to fund a substitution project. TxDOT staff will consider the justification of each proposed substitution on a case-by-case basis and prepare specific minute orders for commission action as appropriate.</p>
<u>Policy</u>	<p>Match for preliminary engineering, construction, and right-of-way purchase/utility adjustments will be in accordance with TxDOT's Policy for Matching Funds - Participation Ratios.</p>

Levels of Authority

CONSTRUCT - Projects authorized for complete PS&E preparation, right-of-way acquisition, utility adjustments and construction letting. (Current year plus the next ten years). The Bridge Division will review the potential bridge projects, authorize their letting and monitor the TxDOT districts' ability to reach their letting targets shown on the summary page of Exhibit C.

2004

UNIFIED TRANSPORTATION PROGRAM-
Statewide Preservation Program
EXHIBIT B

**CATEGORY 1- PREVENTATIVE MAINTENANCE AND REHABILITATION
ALLOCATION PROGRAM AMOUNTS**

Blank Page

ALLOCATION PROGRAM AMOUNTS

A summary of the highway construction allocation program amounts can be found on the following pages for Category 1- Preventive Maintenance and Rehabilitation. The Texas Transportation Commission (commission) has previously authorized allocations in Fiscal Years 2004 through 2006. **The proposed Fiscal Year 2007 allocation will be approved through the minute order approving the entire FY 2004 Statewide Preservation Program.**

The program amounts shown have CONSTRUCT authority, therefore a programmed project can be let to construction as soon as the construction plans are complete, the project is listed in the Statewide Transportation Improvement Program (STIP) and on the approved letting schedule.
